

[JIRA Macro](#)

Preamble

This page is now quite old, and the wiki macro available here will only works for XWiki 0.9.x !

XWiki 1.x users should look at the [new home of the JIRA macro](#). Introduction

This macro is freely inspired by the [jiraissues](#) macro provided for [Atlassian Confluence](#). It is simply used to display easily an issue list.

You just have to provide the JIRA Feed URL (The "XML" link on the JIRA issues pages) in order to display nicely the feed within XWiki. Distribution

Binaries are attached to this page. Currently, it requires Java 5.0.

Sources are only available through Subversion :

- <svn://svn.forge.objectweb.org/svnroot/objectweb/xwiki-plugins/jira>

View the sources online:

- <http://svn.forge.objectweb.org/cgi-bin/viewcvs.cgi/objectweb/xwiki-plugin/jira/>

How to use it ?

Installation

1. Download the jar attached to this page and drop it into your XWiki install/working directory , in `WEB-INF/lib/`.
2. Restart your XWiki instance and ...
3. ... You're done !

Parameters :

... EasyBeans ... JIRAMacro

Name	Description	Required	Default
url	The JIRA URL Feed		no default value
columns	The columns that should be displayed		Type,Key,Summary
title	Override the feed title (to be displayed on the top)		Use the feed title
count	Display the issues count		true

Columns accepted values (case is not significant) :

- Type: Issue type (Bug, New Feature, ...)
- Key: Issue Identifier (EZB-114)
- Resolution: Is issue resolved ?
- Status: Issues state (Open, Closed, ...)
- Summary: Short description of the issue
- Reporter: Name of the person who report that issue
- Assignee: Name of the person who should work on that issue

Example

```
{jira:url=http://jira.easybeans.org/secure/IssueNavigator.jspa?view=rss&pid=10000&fixfor=10010&sorter/field=iss
```

Produces :

JIRA - EasyBeans (EJB3 Container) (20 issues)		
Type	Key	Summary
	EZB-125	Tests with Oracle Toplink Essentials 2.0build21
	EZB-124	Upgrade to Hibernate EntityManager 3.2.0.GA
	EZB-122	Upgrade to HSQLDB 1.8.0.7
	EZB-121	Upgrade to Hibernate EntityManager 3.2.0.CR3
	EZB-120	Upgrade to Monolog 2.1.6 (used by Joram)
	EZB-119	Upgrade to Carol 2.2.9
	EZB-118	NPE when stopping HSQL database within Tomcat
	EZB-117	JOnAS stop command fails in some cases when EasyBeans is present
	EZB-116	EasyBeans failure when embedded in JOnAS with IIOP protocol
	EZB-115	ClassNotFoundException may happen when receiving MDB messages
	EZB-114	Injection of JMS objects (Topic, Queue, and the factories)
	EZB-113	Upgrade to Hibernate Entity Manager 3.2.0 CR2
	EZB-112	MDB Factories are not added to the map of JContainer3 managed factories
	EZB-111	Transaction Timeout should be configurable on TMCComponent
	EZB-52	Support PersistenceUnit reference injection using only the @PersistenceUnit attribute "name".
	EZB-49	Support PersistenceContext reference injection using only the @PersistenceContext attribute "name".
	EZB-42	Support for security management.

::: EasyBeans ::: JIRAMacro

	EZB-9	MDBContext injection
	EZB-8	Local exception should be converted into RemoteException
	EZB-6	Check that all API used by EasyBeans are compliant with the versions packaged by Sun

Future

- Requires JDK 1.4 only
- Configuration capabilities
- Add tests :)
